

# MC Production Update

Andreas Warburton and Rob Harr

Dec. 1, 2005

# Gen 6 Tarball

- Problem with vertex and corrected d0 distributions found; fix is not in tarball.
- 6.1.3pre6 (version 1.16) is the “target for validation”.
- Issue found today with CPR alignment. Under investigation.

## 6.1.3 MC Release

- EWK people have their corrected tarball.
- No other groups have expressed a need to start generating 6.1.3 MC immediately.
- Ashutosh proposes that EWK group begins their 6.1.3 generation, and continues validation for another week or so.
- If no more issues arise, then we release 6.1.3 MC. I suggest a target date of Thursday, Dec. 8.
